

Dr. Varun Suroliya

Research Scientist

BRIEF PROFILE

Varun Suroliya is a passionate and proficient genome researcher with a background in genomics. He has completed his Ph.D. at AIIMS, New Delhi and CSIR institute of genomics and integrative biology in a collaborative manner, where he focuses on understanding and investigates the genomics of neurogenetic disorder especially spinocerebellar ataxia and has developed a strong foundation in scientific expertise. Along with he has been part of multiple national and international projects which is published in reputed journals. After completion of his Ph.D. he joined ILBS hospital, New Delhi and establish the sequencing facility for covid and multiple other applications.

In Artemis hospital, he takes care of genome sequencing facility, where he aims to actively engage with discovery and genetic screening of cancer, inherited, reproductive and infectious diseases. He is also focused in his independent research area in neurological and neuromuscular disorders. He is very positive for collaboration and training activities with clinicians, scientists, researchers and experts.
